 **MY PORTFOLIO**

EDUCATION

University

2024 - 2028

Newton School Of Technology, Pune

AWARDS & CERTIFICATIONS

- Finalist in SIH 2025.
- Won Multiple Hackathon.
- Build Many Real World Solutions

SKILLS

- HTML , CSS
- PYTHON, NUMPY and PANDAS
- NODE.js , EXPRESS
- REACT.js
- SQL and MONGODB
- AI DEV TOOLS
- PROMPT ENGINEER

PROFILE

Software Engineer specializing in Full-Stack Development and AI, experienced in building scalable web applications using React, Node.js, and Python. Strong in REST API development, authentication (JWT/OAuth), and database management (MySQL, MongoDB). Hackathon winner with proven ability to deliver real-time, user-centric solutions.

MY PROJECTS

BUILD A WEBSITE MONITOR

Up time monitor | CODE LINK

19 MAY -21 MAY

- Built a robust uptime monitoring system using Node.js and Cron jobs, with TiDB-based logging and data persistence, enabling reliable tracking and analysis of system availability and performance
- Integrated an automated email alert and notification system to proactively detect failures, significantly reducing downtime response time and improving overall system reliability

A QR MEAL SYSTEM FOR MY COLLEGE

smart meal system | CODE LINK

21 JAN 2026 - 14 FEB 2015

- Developed a QR-based meal verification system using Node.js, Express.js, and MongoDB, enabling secure, scalable, and efficient access control for authorized users across the platform
- Built and optimized real-time validation RESTful APIs to ensure seamless QR code verification with low-latency data synchronization between client and server systems
- Designed and developed an admin dashboard with monitoring and manual verification capabilities, improving fraud detection, auditability, and operational transparency
